EXPERIENCE

PAE, San Francisco, CA | 01/2018 - present
Technology Designer D-2
- Communicate design options to owners, architects and other disciplines.
- Complete and coordinate project documentation within an interdisciplinary team to meet scheduled delivery.
- Conduct site visits to monitor construction progress and issue observation reports.
- Apply knowledge of BICSI standards & Telecom/AV/Security Systems.
- Review construction administration documents such as submittals and requests for information.

Springboard | 10/2017 - 01/2018
UX Boot Camp Student
- Completed a successful 100-hour online UX design workshop that covers user centered design.
- Mentored by industry professional and UX/UI designer Megan Clayon from Whirlpool Corporation.
- Presented to the online Springboard community my capstone project "Yelp - Bookmarking", a project in which I enhanced the user experience through a redesign of the Yelp bookmarking function.

Tanaka Design Group, San Francisco, CA | 03/2016 - 12/2017
Landscape Designer

- Drafted construction documents through AutoCAD in collaboration with other consultants.
- Produced illustrative and conceptual drawings for display use.
- Presented quality drawings to communicate design intent at community meetings.
- Surveyed project sites to document and confirm locations of irrigation equipment and existing and new plants.
- Reviewed and approved submittals and RFI for general construction information.
- Researched and acquired permits through San Francisco Public Works to obtain approval towards project completion.
